Ulrich Reisacher (GPS Reisacher - CEO)

welcome to **gps reisacher**

We supply the world market with system solutions and rebuilt second-hand machines in the areas of food processing and packaging systems. A worldwide maintenance and warranty concept ensures our customers perfect after-sales support.

You can also benefit from our comprehensive market knowledge, many years of experience and the high-tech know-how of our qualified employees.

about **gps reisacher**

GPS Reisacher is a globally respected company for new and professionally rebuilt machines in the fields of food processing and packaging solutions. The company location in Bad Grönenbach in the Allgäu region not only serves as a storage, development and production location for the numerous machines and systems. In the meantime, another competence center has been set up with a complete service center and is constantly being expanded. GPS Reisacher supplies all seven continents with solutions for the food processing and packaging. A worldwide maintenance and warranty concept guarantees our customers perfect support even after the purchase. You too can benefit from our comprehensive market knowledge, many years of experience and the high-tech know-how of our qualified employees.

New machines

 PACKAGING - CHAMBER

VACUUM PACKAGING MACHINE 2XL SERIES

The 2XL series consists of robust vacuum packaging machines designed for professional applications in large-scale trade and industry. These double chamber machines are made of high quality, easy-to-clean stainless steel and offer reliable performance and long-lasting quality. On the latest 2XL-85 and 2XL-95 vacuum machines there is an optional automatic lid for the best ergonomics and the advantage of an increased production rate. (Machine cycle: between 15 and 45 sec)

The machines are equipped with a Busch vacuum pump and comply with CE standards. They offer a wide range of options and accessories to meet individual requirements.

Areas of application

-  Meat and sausage products
-  Fish
-  Cheese
-  Vegan
-  Fruit & Vegetables
-  Pasta
-  Medical technology products
-  Technical & Industrial Products

SPECIFICATION **2XL SERIES**

REISACHER 2XL SERIES - RELIABLE VACUUMING

The reisacher 2XL series impresses with its versatility and reliability. With different sealing bar lengths, a high-quality Busch vacuum pump and a digital control, these vacuum packaging machines offer optimum performance. Removable silicone containers make cleaning and maintenance easy, while optional cut-off welding/wide welding offers additional flexibility. The machines feature a flat worktop, insert plates for efficient product placement and a robust stainless steel chassis. With IP-65 classification, they are also protected against dust and water.

- Different sealing bar lengths
- Double welding or optional cut-off welding/wide welding
- Removable silicone tank
- Busch vacuum pump
- Pump conditioning programme
- Digital control with preselection programmes
- Soft-Air for product protection
- Plane worktop
- Insert plates for fast processing cycle
- Robust stainless steel chassis
- IP-65 classification

ADVANTAGES **2XL SERIES**

- **Professional vacuum packaging solution**
for various applications and industries.
- **High-quality stainless steel construction**
for reliability and durability.
- **Flexibility through various options and accessories,**
to meet individual needs.
- **User-friendly digital control**
for easy operation.
- **Optimal product placement and protection**
through soft air and adjustable parameters.
- **CE and ETL certified**
reisacher machines comply with ETL, UL, CSA, NSF and CE standards
- **up to 3 years warranty**
reisacher offers up to 3 years warranty on spare parts

Sous-vide cooking

Sous-vide cooking is an effective method of food preparation in which the cooking temperature is adjusted and kept constant for each dish. It is particularly suitable for meat, fish, vegetables and fruit, sauces and soups, main courses and desserts.

Packing food

Individual products, small portions or bulk packaging are vacuum packed, mainly to extend shelf life. Suitable for foods such as game, beef or pork, poultry, fish, dairy products, soups or ready meals.

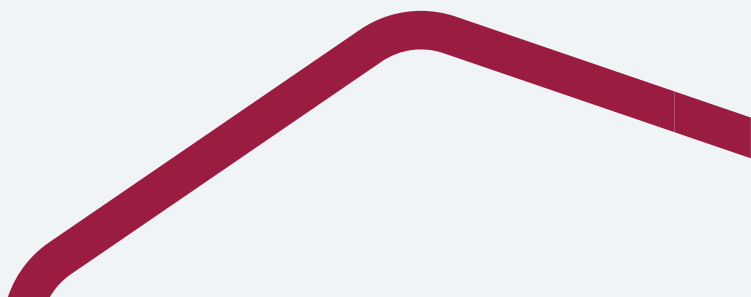

Gastronomy

In the hospitality industry, vacuuming offers numerous advantages that often also lead to cost reductions: longer shelf life, purchasing at a better price, optimal staff organisation, promotion of hygiene and improvement of quality.

Non-food packaging

In many non-food industries, it is known that airtight packaging offers numerous advantages: Protection against moisture and dirt, volume reduction, less transport damage, prevention of corrosion, lower storage and transport costs, completeness in picked packages.

TECHNICAL DATA 2XL SERIES

VACUUM CHAMBER MACHINES REISACHER 2XL SERIES

Model	Dimensions chamber in mm (LxWxH)	Dimensions machine in mm (LxWxH)	Welding bar in mm	Capacity pump

ACCESSORY EQUIPMENT OPTIONS **2XL SERIES**

We will be happy to provide you with various accessories for the reisacher 2XL SERIES.

THERMAL LABEL PRINTER

(only available for machines with ACS control)

Ultra-compact label printer for creating labels for relevant packaging details. Essential package details, such as product name, package and expiry date and storage temperature, are printed automatically during the vacuum packaging cycle. A thermal label printer offers many advantages for any vacuum packaging process. The label printer from reisacher is compatible with ACS control and fully HACCP compliant.

SPECIFICATIONS

- Direct thermal
- Programming language ZPL and EPL
- 5 status icon, 3-button user interface
- USB 2.0, USB host
- OpenACCESSTM for easy media loading
- Dual-wall platen direction
- ENERGY STAR compliant
- Includes label dispenser, 1 roll of labels, connection cable and configuration.
- Bluetooth energy arm
- Only available for machines with ACS control

TECHNICAL DATA

- Resolution 203 dpi/8 dots per mm
- Memory: 512 MB Flash; 256 MB SDRAM
- Max. Print width: 56 mm for 203 dpi
- Max. Print speed: 152 mm per second (203 dpi)
- Firmware: ZPL II, EPL 2, EPL Line Mode, XML, ZBI

INCLINED INSERT

For optimal product positioning

The inclined insert plate offers maximum convenience when packing liquids or powders such as soups, sauces and flour. The ability to position the vacuum bag at a specific angle in the chamber keeps the product precisely in place. The inclined insert is available in different sizes and fits all models.

SERVICE KIT

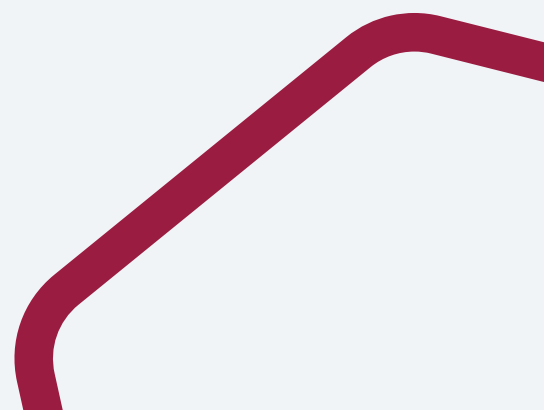

Service kits for smooth maintenance

reisacher provides service kits for all machine models. Each service kit includes sealing bars, Teflon tape, cover gasket, oil for the pump and silicone strips for the counter bar. The service kits can be purchased together with the machine or as accessories after purchase.

For the floor models, it is necessary to order the oil separately due to the varying quantities depending on the pump size.

Please note that specifications and options may vary depending on the model. The above information is provided as a general overview and may vary slightly depending on the specific model.

what counts in **service** is **action**, not the **promise!**

At reisacher we know that a product is only as good as the service and the people behind it. That is why we are highly committed to providing our customers with perfect customer service. We have a separate business unit for customer service, which is just as important as the area of our products. Our highly qualified specialist staff is always available to provide you with all the services you need. We accompany you throughout the entire life cycle of your packaging equipment and offer you a wide range of services:

Do you need help? Write to us!

Our service offer on site

maintenance & repair by reisacher

We offer dedicated after-sales service with high quality service. Our after-sales service is an independent business division and has the same priority as our machines. A competent and reliable department with highly qualified specialist personnel is available to you for all services. Take advantage of our reisacher service know-how to optimise your production process and ensure that your machines and equipment always function optimally.

To relieve you in the best possible way, we round off our service concept with our maintenance contract offers for your machines. Our team will actively contact you at the desired maintenance intervals.

Please use the following contact details:
service@gps-reisacher.com

second level support from reisacher

Of course, we are also available to you after delivery of your machine. Often, incorrect settings or problems can be clarified over the phone. This means less downtime and no service costs for you.

A particular advantage is our remote maintenance access via VPN connection to the machine.

Use the following contact details for this:
support@gps-reisacher.com

Give us a call!

application technology & overhaul

IN THE COMPLETE PACKAGE FROM REISACHER

Application technology:

Benefit from the years of experience of our competent application engineers for your production process. We will be happy to work with you on site to develop the best possible solutions for your production. We will then train your personnel in this respect. Our goal is to promote your production process and avoid unplanned downtimes. We increase your quality, efficiency and profitability and save time and money.

Overhaul:

reisacher has a comprehensive replacement programme of tested components for food processing and thermoforming machines. For thermoforming packaging machines, we have an extensive repair programme for heating and sealing plates, lifting units, cutters and much more.

your reisacher advantages

1. less downtime
2. long service life with our original parts
3. reduced personnel costs and consistently high product quality.
4. Save time and costs and increase the profitability of your business.
