Ulrich Reisacher (GPS Reisacher - CEO)

welcome to **gps reisacher**

We supply the world market with system solutions and rebuilt second-hand machines in the areas of food processing and packaging systems. A worldwide maintenance and warranty concept ensures our customers perfect after-sales support.

You can also benefit from our comprehensive market knowledge, many years of experience and the high-tech know-how of our qualified employees.

about **gps reisacher**

GPS Reisacher is a globally respected company for new and professionally rebuilt machines in the fields of food processing and packaging solutions. The company location in Bad Grönenbach in the Allgäu region not only serves as a storage, development and production location for the numerous machines and systems. In the meantime, another competence center has been set up with a complete service center and is constantly being expanded. GPS Reisacher supplies all seven continents with solutions for the food processing and packaging. A worldwide maintenance and warranty concept guarantees our customers perfect support even after the purchase. You too can benefit from our comprehensive market knowledge, many years of experience and the high-tech know-how of our qualified employees.

 **PORTIONING**

CHEESE CLEANING MACHINE
BMR 950

The cheese cleaning machine BMR 950 was specially developed for cleaning round cheese wheels with a diameter of approx. 280 - 950 mm. Cheeses with a firm rind, such as Emmentaler and Gruyère, are cleaned effectively with various cleaning devices, such as the integrated scraper knife as standard. With naturally ripened cheeses, scraping or brushing off the firm rind almost goes by itself. With minor modifications, the BMR 950 can also be used to clean extra-hard cheeses such as Parmesan.

The machine generates a vacuum to fix the cheese loaves on the turntable and set them in a rotating motion. With an infinitely variable turntable speed and a cleaning time of about 3 minutes for an Emmentaler loaf, the BMR 950 ensures a high degree of cleaning and optimal results.

Depending on the surface condition, you can use different cleaning devices such as standard scraping knives for chip-removing cleaning or rotary brushes for removing cheese dust.

Areas of application

 Cheese

 Vegan

ADVANTAGES **BMR 950**

- Reliable electromechanical drive
- Effective cleaning of round cheese wheels of different diameters
- Different cleaning devices for different surface conditions
- Easy operation with electric foot switch
- Infinitely variable gear for adapted turntable speed
- High-quality stainless steel construction for durability and hygiene
- Optional accessories for individual requirements

what counts in **service** is **action**, not the **promise!**

At reisacher we know that a product is only as good as the service and the people behind it. That is why we are highly committed to providing our customers with perfect customer service. We have a separate business unit for customer service, which is just as important as the area of our products. Our highly qualified specialist staff is always available to provide you with all the services you need. We accompany you throughout the entire life cycle of your packaging equipment and offer you a wide range of services:

Do you need help? Write to us!

Our service offer on site

maintenance & repair by reisacher

We offer dedicated after-sales service with high quality service. Our after-sales service is an independent business division and has the same priority as our machines. A competent and reliable department with highly qualified specialist personnel is available to you for all services. Take advantage of our reisacher service know-how to optimise your production process and ensure that your machines and equipment always function optimally.

To relieve you in the best possible way, we round off our service concept with our maintenance contract offers for your machines. Our team will actively contact you at the desired maintenance intervals.

Please use the following contact details:
service@gps-reisacher.com

second level support from reisacher

Of course, we are also available to you after delivery of your machine. Often, incorrect settings or problems can be clarified over the phone. This means less downtime and no service costs for you.

A particular advantage is our remote maintenance access via VPN connection to the machine.

Use the following contact details for this:
support@gps-reisacher.com

application technology & overhaul

IN THE COMPLETE PACKAGE FROM REISACHER

Application technology:

Benefit from the years of experience of our competent application engineers for your production process. We will be happy to work with you on site to develop the best possible solutions for your production. We will then train your personnel in this respect. Our goal is to promote your production process and avoid unplanned downtimes. We increase your quality, efficiency and profitability and save time and money.

Overhaul:

reisacher has a comprehensive replacement programme of tested components for food processing and thermoforming machines. For thermoforming packaging machines, we have an extensive repair programme for heating and sealing plates, lifting units, cutters and much more.

your reisacher advantages

1. **less downtime**
2. **long service life with our original parts**
3. **reduced personnel costs and consistently high product quality.**
4. **Save time and costs and increase the profitability of your business.**
