A machine conceived and designed for optimum practical application.

**Areas of application**

 Cheese

 Vegan

## SPECIFICATION **GES 1000**

### REISACHER GES 1000 - PRECISE CUTTING PROCESS

#### STANDARD VERSION:

- Manual turntable  
This makes it possible to cut cheese loaves and rings into segment portions of 4-88 pieces, as well as cheese loaves and blocks into sticks with freely selectable bar widths. These cheese sticks can be divided into portions in a further work step with the same machine.
- Hinged product down holder.  
This increases the machine's ease of servicing and cleaning.

#### SPECIAL VERSION:

- Automated turntable.  
It replaces manual turning when cutting segmented portions.
- Optimat programme.  
Enables an optimal yield for cheeses with different dimensions by entering a tolerance value for the bar width.

## ADVANTAGES **GES 1000**

- Manual turntable, with option of automated operation
- Safety doors with 90° aperture (optimum machine access)
- Optional equipment for block cutting
- Easy operation of machine thanks to intuitive controls
- Hinged product down holder
- Easily accessible cutting edge
- Cutting edge tilt mechanism (optimised cutting)
- Easy to clean
- Cutting of sticks, segments, portions (in full-equipment version)

## what counts in **service** is **action**, not the **promise!**

At reisacher we know that a product is only as good as the service and the people behind it. That is why we are highly committed to providing our customers with perfect customer service. We have a separate business unit for customer service, which is just as important as the area of our products. Our highly qualified specialist staff is always available to provide you with all the services you need. We accompany you throughout the entire life cycle of your packaging equipment and offer you a wide range of services:

- Maintenance & Repair
- Second-level support
- Application technology & overhaul
